Tartan Revive

CHOOSE TO CREATE COLLECTION

Create your individual 'Tartan Revive' floor

Discover the new TARTAN styles and their preconfigured design options in this brochure and on the arc edition website.

With the Choose to Create collection, you can quickly and easily craft your own personalised textile flooring solution. Digital printing technology enables us to evolve traditional designs into new contemporary patterns. Used with Tartan Revive, it allows us to print fine gradients with overlaid colours and large pattern formats lead to flawless, fascinating designs.

Choose between cut pile, saxonomies and loop pile structure options to bring out the very best in your Tartan Revive designs, and select the performance/comfort balance required for your project.

1/ **'Tartan' your floor**

Our 'Tartan Revive' designs are based on the ancient Celtic art form of plaid weaving. This theme enables us to fully harness the grid as a design tool, and new technology empowers us to translate celebrated tartan motifs into flooring that effortlessly blends culture, elegance and comfort.

2/ traditional Tartan shades

Use Tartan's traditional colours of green, blue, terra and red to evoke loyalty, trust and success. Their deep saturations are contrasting and bring out the tartan grid in different ways.

Together with a gradient effect they offer a modern, subtle look and exude comfort. Translated to more dominant motifs, they draw the eye of a visitor and create a familiar cosiness in business environments.

Oly

tonal Tartan shades

Choose neutral, easy-going tonal shades to bring out the retro allure of your Tartan design and decorate with soothing harmony in mind.

Different grays and beiges are keeping things simple and pure. Tartan Designs in tonal colours give floor spaces a pared-down and airy feel, but with depth and details that keep things feeling welcoming and cozy for staff and visitors.

'Choose to create' your individual flooring

4 steps to a personalised flooring design

1. **Design:** use our online guide to quickly select the design that fits your project.
2. **Colour:** choose from a broad range of curated shades to match individual schemes.
3. **Cloth:** select the high-performance carpet type to deliver the look and features you need.
4. **Backing:** choose from 3 backings to add stability, comfort and acoustic insulation.

Accommodates designs for spaces from 240 m² in surface area and up to 5m wide.
